

# QDD Journey Course 1

## The relationship between learning objectives and course activities

The specific learning objectives of this course are: covered in:

Evaluate problems with a team as a means of design input. Lessons 1 to 6

Develop group discussions to explore potential risks in product concepts. 1 to 3

Identify ways design can control risks within a system. 3 & 5

Define design priorities and actions based on risk throughout the development process. 2, 5, 6, & 7

Describe how risk analyses link and why we do different types of risk analyses (including FMEA - failure mode and effects analysis). 4 & 7

Choose categories to monitor in the field based on risk analyses, following a model of continuous improvement. 4, 5, & 8
